

A Candidate retention by shared-variant prior

412 exploratory probes; all three pairwise H4 ≥ 0.50

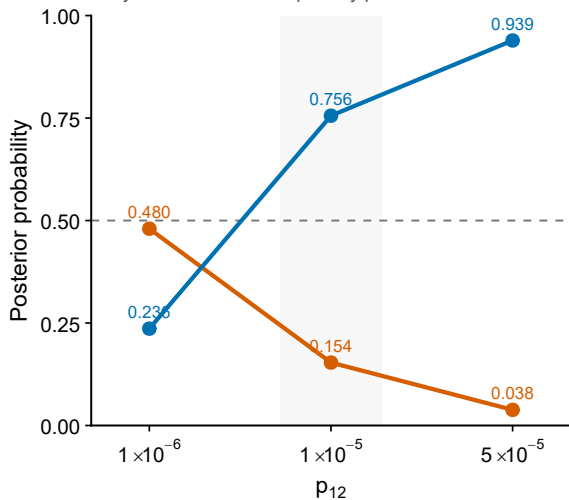

D Minimum pairwise H4 by prior

Weakest H4 across eQTL-HTN, eQTL-CDD and HTN-CDD

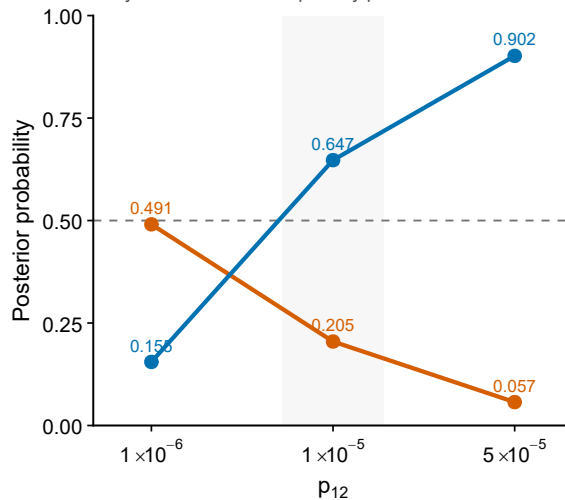

B *NT5C2*: HTN-CDD posterior sensitivity

Grey band indicates the primary prior

C *RMC1*: HTN-CDD posterior sensitivity

Grey band indicates the primary prior

— H3: distinct causal variants — H4: shared causal variant
